

## **Continuing the Work of the Consolidation Group**

In February 2006 industry participants constituted the DCUSA Steering Group to take forward the work of the Consolidation Group which drew to a close at the end of 2005.

The industry considered it appropriate to have the supporting documentation for the new stage of the development process hosted on an industry website. Persons wishing to locate documents relating to the discharge of work undertaken by the Steering Group can find them by clicking on [this link](#).

Key documents produced by Ofgem relating to this project will continue to be made available in the [Electricity Governance \(Distribution\)](#) Area of Work on the Ofgem website.
