6 November 2006

Dear Colleague,

**Decision in relation to modification proposal to the connection charging methodology: Extending the Scope of Contestable Works.**

On 27 October 2006, Central Networks West ("CNW") submitted to the Gas and Electricity Markets Authority ("the Authority")<sup>1</sup> a proposal to modify its connection charging methodology for its CNW area.

The proposal modifies the connection charging methodology statement to clarify CNW's approach to competition in connections in line with Ofgem's decisions.

Having carefully considered the issues raised in the proposal, the Authority has decided not to veto the proposed modification.

This letter sets out the background to the modification proposal, explains briefly the proposed changes and sets out the reason for the Authority's decision.

*Background*

CNW has licence obligations<sup>2</sup> to have in place as of 1 April 2005 three charging statements: the statement of use of system ("UoS") methodology, the statement of UoS charges and the connection charging methodology. The connection charging methodology outlines the method by which connection charges are calculated. CNW has a requirement to keep the methodology under review and bring forward the proposals to modify the methodology that it considers better facilitate achievement of the relevant objectives.<sup>3</sup>

---

<sup>1</sup> Ofgem is the office of the Authority. The terms 'Ofgem' and the 'Authority' are used interchangeably in this letter.

<sup>2</sup> Standard licence conditions 4-4B.

<sup>3</sup> The relevant objectives for the connection charging methodology, as contained in paragraph 3 of standard licence condition 4B of CNW's distribution licence are:

- (a) that compliance with the connection charging methodology facilitates the discharge by the licensee of the obligations imposed on it under the Electricity Act 1989 and by this licence;
- (b) that compliance with the connection charging methodology facilitates competition in generation and supply of electricity, and does not restrict, distort or prevent competition in the transmission or distribution of electricity.

### *CNW Modification proposal*

CNW proposes to clarify the connection charging methodology statement in the following way:

- To extend the description of the work which can be contested to include diversionary and reinforcement works in accordance with the Ofgem April decision letter<sup>4</sup>.

In April 2006 Ofgem published a decision letter on the proposal for extending the scope of contestable works in relation to competition in electricity connections. This further facilitated competition in connections by extending contestability to connection reinforcement and diversionary works that are completely and electrically separate from existing DNO infrastructure and do not require access to existing DNO operational areas, fully funded by a single third party or customer. The modification proposal is consistent with Ofgem's decision document.

### *The Authority's decision*

The Authority has considered the proposal against the relevant objectives and wider statutory duties. The change to the connection charging methodology statement improves the clarity of the statement and provides greater detail to parties on the scope of competition in connections. This change better facilitates achievement of the relevant objectives by allowing CNW to better discharge its duties under the licence. By allowing parties to better understand the charging methodology this may further facilitate competition in electricity connections.

The Authority has decided not to veto the modification to the connection charging methodology statement.

Please contact Laura Nell on 020 7901 7201 if you have any queries in relation to the issues raised in this letter.

Yours faithfully,

Martin Crouch  
Director, Distribution

Signed on behalf of the Authority and authorised for that purpose by the Authority

---

(c) that compliance with the connection charging methodology results in changes which reflect, as far as is reasonably practicable (taking into account of implementation costs), the costs incurred by the licensee and its distribution business; and

(d) that, so far as is consistent with sub-paragraphs (a), (b) and (c), the connection charging methodology, as far as is practicable, properly takes account of developments in the licensee's distribution business.
