

RPZ – CURRENT STATUS

- **EDF Energy** – Martham Primary RPZ
GenAVC Voltage control in Norfolk (11kV)
- **Central Networks** – Skegness & Fens
Dynamic line ratings (132kV)
- **Scottish Hydro Electric Power Distribution**
Orkney RPZ active network management (33kV)

RPZ – Constraints

- Window of opportunity is closing – must be connected by March 2010 – could this be relaxed?
- Clarity required on eligibility of applications made prior to April 2005 – What about applicants held in constraint ‘queue’?
- Restricted Application - Distribution only so 132kV in Scotland is excluded and could yield more RPZs
- Level of incentive too low to generate schemes?
- Only 80% Pass through of DG reinforcement costs discourages schemes which will be expensive for the DNO
