7th December 2006

Dear Mr Hussain

Review of policy on licence revocation

Phoenix Natural Gas would like to take the opportunity to respond to the recently published Open Letter on the above issue.

Despite not currently shipping gas through the NTS, it is still a benefit to our business to possess an NTS Shippers Licence. We currently access and use information from Gemini to assist with our NDM gas forecasting. Continued access to this information is essential for our business operations.

We hope that this consultation will take such considerations into account and that each licence is reviewed on a case-by-case basis.

Yours sincerely

Michael
