Offshore Transmission 2nd External Communications Session – Postponement notice

Dear Colleague,

As you will be aware Ofgem and the DBERR (formerly DTI) intend to hold an external communication session to provide an opportunity for discussion on the development of the offshore electricity transmission regime, building on the key themes set out in the next policy statement. We currently expect to publish the policy statement later this month.

We have previously advertised that the external communication session would take place on 17 July 2007. It is important that stakeholders have a sufficient period to consider the July policy statement in order to contribute effectively to the external communication session. As such, the intended date of 17 July 2007 is no longer appropriate and the meeting has been postponed. It will now take place on:

10th August 2007, 10:00am - 13:30pm
DBERR Conference Centre
1 Victoria Street
London SW1

An agenda and any associated papers will be circulated in due course.
Attendance is limited to one representative per stakeholder, unless by prior arrangement.

To reserve your place please respond to:
offshore.transmission@dti.gsi.gov.uk by close on Tuesday 6th August 2007.
Please accept our apologies for any inconvenience this may cause.

If you have any questions or queries please contact:
Andrew Mann, Senior Programme Manager, Ofgem
