Charles

Thank you for your time on 20 September.

As we discussed, I canvassed our product area managers and they would like annual information on the types of products sold as part of CERT schemes. This would facilitate our understanding of the market and its trends and would improve the accuracy of our modelling.

This would include sales of :

- cold, wet and cooking equipment by type eg fridge, freezer, fridge/freezer,
- CFLs sold or given away
- information and communication technology (ICT) equipment ie desktop PCs, laptop PCs, monitors, inkjet printers, inkjet multifunction devices and photoprinters etc.
- consumer electronics by type eg integrated TVs

I hope this can be accommodated. I would be pleased to discuss the detail should the principle be established.

Best wishes

John
