Consultation on proposals for dealing with requests for Authority consent under Standard Licence Condition 15 of the Electricity Generation Licence

Dear Sarah,

We welcome the clarity that your proposals bring to this issue. We just have a couple of points that you may wish to consider as possible additions, these are in the bullet points below.

- The exercise of the right does not frustrate any activities being undertaken or to be undertaken by the land owner/occupier
- The licensee should abide by all site rules

We hope you find these helpful, please call if you wish to discuss.

Yours sincerely

Alan McAdam
Economic Regulation Manager
