Date: 17 June 2008

Dear Colette

**Connection charging methodology and statement - modification proposals**

CE Electric UK Funding Company (CE) is the UK parent company of Northern Electric Distribution Ltd (NEDL) and Yorkshire Electricity Distribution plc (YEDL).

In accordance with the requirements of paragraph 13.4(a) of standard condition 13 of the distribution licence, I am submitting reports in respect of a proposed modification to the connection charging methodology of both NEDL and YEDL for which we are hereby seeking the Authority's consent. We have produced two separate proposals (one for each licensee) for ease of administration:

- 0011Y/2008 – one voltage level above point of connection (YEDL)
- 0011N/2008 – one voltage level above point of connection (NEDL)

The proposed change would apply identically to each statement and I have attached a change-tracked copy of our YEDL statement for reference. It seeks to aid the understanding of reinforcement by inserting the term 'point of connection' into the text within bullet point 2 of section 11.5 (Reinforcement). This proposal is being submitted at the same time as two other apportionment related housekeeping changes. The three proposals are being submitted separately in order that each is considered individually, on its own merits.

I trust the attached information provides you with sufficient detail to enable you to make a decision as to whether or not the proposed changes better meet the relevant objectives set out in paragraph 13.3 of standard condition 13 of the distribution licence. If you have any queries or concerns regarding the above, or if you would like to arrange a meeting to discuss, please do not hesitate to contact me.

Yours sincerely

*Chris Allanson*
