Dear Anthony

**Scottish Hydro Electric Transmission Limited (SHETL)
Transmission Owner (TO) Charging Statement**

On 4 March 2008 SHETL submitted its revised TO Charging Statement to the Authority for approval in accordance with the provisions of Special Licence Condition J10.

Since making this submission we have identified a housekeeping error in Part 3 of the revised statement. You will note that one of the significant revisions to our statement for 2008-09 was the addition of a section entitled "Contestable Connection Works". This section is intended to replace the section "Self-Build Option"; however, in our submission of 4 March 2008, the section "Self Build Option" was not deleted. I attach to this letter a further change-marked version of the statement with this section deleted.

We have discussed this proposed revision to our TO Charging Statement with Nigel Fox at National Grid who has confirmed that National Grid is content with this change.

Please do not hesitate to give me a call if you wish to discuss this further.

Yours sincerely,

Aileen McLeod
Regulation Analyst
