

Administrative Clarifications

This note logs administrative clarifications in respect of the first round of tenders for offshore electricity transmission owner (OFTO) licences.

Clarification No. 1

Under item II.1.9 of the OJEU Notice, listed next to the project Greater Gabbard, the current 'Transmission Construction Status' date has been stated as 'October 2010'.

Please note that this date should actually read as 'March 2011' as confirmed in the PIM for that project.

Clarification No. 2

Under item II.1.8 of the OJEU Notice, the following text appears in each of the nine lots listed: *'The Contracting Authority intends to use an eTendering system in this procurement exercise and reserves the right to use a reverse auction.'*

Please note that Ofgem does not intend to use a reverse auction at any stage of this tender process.
