

## **Garbhaig Hydro Power Co Ltd**

Re the above I represent Garbhaig Hydro Power Co Ltd, Assynt Hydro and 22 other members of ALBA Energy Ltd Most of Whom are pre 2005 Generators. Assynt operates under an SRO contract which expires in 2014. The others are independent generators. all of whom paid a connection charge.

I would suggest that all pre 2005 generators be left without Duos charging which saves any disputes regarding compensation whether payable or not and their connection charge should last for the period of life of their asset which is a minimum of 25v years and the rafter they can be charged Duos.
