

Northern Gas Networks is the distribution company delivering gas to 2.5 million homes and businesses across northern England.

Our area covers 27,000 square miles and has a population of 6.7 million people in northern Cumbria, the North East and most of Yorkshire.

Our network vision is to be consistently measured by Ofgem and the Health & Safety Executive in the top two comparable utilities for customer service, efficiency and health & safety.

Each year we replace more than 320 miles of ageing metal gas mains with new polyethylene (pe) pipes, an investment of around £80 million. We work hard with our stakeholders to reduce the inconvenience caused by these essential works.

Northern Gas Networks also provides the 24/7 gas emergency service in our region, responding to emergency calls whenever and from wherever they are made.
