

About Scottish and Southern Energy

Scottish & Southern Energy is a provider of energy to over eight million customers. We deliver electricity to 3.5 million homes, offices and businesses in Britain. We are the largest generator of renewable energy, the second largest energy supplier and second largest energy network owner in the UK.

Purpose and Values

Our purpose is to provide people with the energy they need in a reliable and sustainable way.

We work hard to penetrate our six core values throughout the company. These values are very important to us:

Safety: We believe accidents are preventable, so we do everything safely and responsibly or not at all.

Service: We give our customers service we are proud of and make commitments that we deliver.

Efficiency: We keep things simple, do the work that adds value and avoids wasting money, materials or time.

Sustainability: We operate ethically, taking the long-term view to achieve growth, while safeguarding the environment.

Excellence: We strive to get better, smarter and more innovative and be the best in everything we do.

Teamwork: We support and value our colleagues and enjoy working together as a team in an open and honest way.

About SSE Power Distribution

SSE Power Distribution (Southern Electric Power Distribution and Scottish Hydro Electric Power Distribution) distributes circa 43 TWh of electricity to 3.5 million customers each year.

Covering over 30% of the British Isles, SSE distributes electricity to some of the most remote areas – and most densely populated areas – of the UK.

As we constantly seek to improve the management of the distribution networks we own, the number of customer minutes lost because of power interruptions continues to fall. As a result, SSE Power Distribution networks are more than 99.99% reliable.
