Subject: Support for SSE Low Carbon Network Fund Bid "Thames Valley Vision"

Dear Sirs,

On behalf of KEMA Ltd, I am pleased to provide a letter of support for the "Thames Valley Vision" Low Carbon Network Fund Bid of Scottish and Southern Energy. I have worked closely with the SSE team who have developed the bid and believe it has the level of boldness, innovation and depth required to accelerate solutions for the low carbon sector.

The proposed "Monitor, Model and Manage" methodology will provide and validate a company and industry alternative to traditional network reinforcement, benefiting UK network existing and future customers and ultimately raising the competitiveness of UK industry.

The proposed partnership with the University of Reading, Department of Mathematics, is a novel and potentially highly beneficial aspect of the project that addresses new ground for the sector. The dynamic customer modelling and tracking will pave the way for radically new thinking, addressing network operations, operational planning and investment decisions.

In my view, SSE's proposal is technically sound and combines good commercial and customer thinking. I would be confident of a successful outcome and high value to the sector.

A handwritten signature in black ink that reads "J G P Scott". The signature is written in a cursive style with a horizontal line underneath the name.
