Original Answer:			

Question:	Several of the agreements with external collaborators have not yet been put in place (either only non-disclosure agreements, or draft MoU); can you provide more detail on the top-level commitments of senior parties?
------------------	-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

Answer:	<p>All our top level partners have signed Non Disclosure Agreements, Letter of Intent and we are in process of agreeing Memorandum of Understandings. That includes GE, Kema, BFC, UoR and Honeywell.</p> <p>Our main technology and solution provider, GE, has already signed an MOU and our intention is to have all MOUs in place by the end of October. As stated in our original documentation the period after Bid Submission and prior to Project Award is very important to us as we intend to continue discussions with our partners and potential funders to finalise details and finalise their commitment to the project.</p> <p>Our partners and funders continue to show their support to the TVV project by continuing work with us on the project even though we do not have any guaranteed funding from Ofgem.</p> <p>Interest in the TVV project is increasing and more businesses are asking to get involved, however our strategy is to keep the number of high level partners to 5, which we think is a manageable number. We will however continue to involve the new businesses in consumer consortiums and other dialogues.</p>
