15 December 2010

Dear Rachel

Consultation on proposed licence modifications: revised delivery dates for the EHV Distribution Charging Methodology (EDCM) and the new distribution charging boundary between higher and lower voltages

I am responding on behalf of our four licensees, Eastern Power Networks plc., London Power Networks plc., South Eastern Power Networks plc. and UK Power Networks (IDNO) Ltd.

I can confirm that having reviewed the documents and proposed changes relating to revised delivery dates for the EHV Distribution Charging Methodology (EDCM) and the new distribution charging boundary between higher and lower voltages, we do not wish to make any representations or directions in respect of them.

We note the requirements set out in the derogation of 30 September 2010 under SLC50A relating to the delivery of changes to the methodology that will allow justification of the charges the methodology produces. Work is ongoing in this area to meet this significant challenge.

If you have any queries please do not hesitate to contact Keith Hutton in the first instance.

Yours sincerely
