

Retail Market Review Response

SOMETHING MANY PEOPLE HAVE KNOWN FOR A VERY LONG TIME.

At long last and well over due some one has decided to do something positive with the biggest rip off in Britten. The energy suppliers have been getting away with this over pricing for far too long and the government should have help you to put a stop to it as its costing them a fortune helping myself and many other people in need of extra benefits.

I am a pensioner and terminally ill with cancer. Keeping my home warm is always a worry even with the extra help from winter payments I'm given from the government.

To me its basic house keeping Energy suppliers should be controlled and then the government would be saving a great deal of money to help get this country out of debt.

I do hope that this problem will be resolved as soon as possible.

Thank You
