Project code:	WPDT2003	Question Number	20
Question date	13/09/11	Answer date	20/09/11
Submission section question relates to	Appendix F		
Topic	Carbon Benefits		
Question	Carbon benefits are based upon a rollout across 200 locations. Are these anticipated to be across the whole of GB networks or primarily within the WPD network?		
Notes on question			
Answer	As referred to in the Answer to Q22, the number of locations are per year. It is expected that 2480 locations will have the BRISTOL solution installed by 2030. These are a very conservative number and anticipated to be across the whole of the UK. This does not include the potential roll out of the solution to incorporate the connection of heat pumps or electric vehicles.
