Project code:	ENWLT2003	Question Number	1
Question date	25 August 2011	Answer date	31 August 2011
Submission section question relates to	2		
Topic	Available Capacity Release		
Question	Please advise if there is any significance in the reference on page 3 to release of 25% of available capacity and the reference in Table 2 to release of 50% capacity.		
Notes on question	n/a		
Answer	<p>The two figures mean the same but are described slightly differently.</p> <p>Assume that the installed network capacity is 100% and the network is currently loaded to 50% of the installed network capacity with 50% reserved for security of supply reasons. The text on page 3 describes that 25% of the installed network capacity is released back to customers ie loading the network up to 75% of its capability (50% + 25%), whilst the text in Table 2 describes that 50% of the capacity reserved for security of supply reasons is utilised, meaning 25% of the installed network capacity is released back to customers (50% x 50% =25%) with the network loaded up to 75% of its capability.</p>
