Project code:	WPDT2002	Question Number	13
Question date	13th September 2011	Answer date	20 th September 2011
Submission section question relates to	Appendix D		
Topic	Risks		
Question	Please can comment further on your scoring for the probability of shortage of resources?		
Notes on question			
Answer	<p>The probability for the risk FAL001 'The Project Team cannot be effectively resourced' was scored as 1 – Very unlikely to occur.</p> <p>Earlier on in the bid phase, during the acquisition of Central Networks, the probability was scored higher due to the organisational uncertainty. The Risk register is a live document and is continuously updated. At the time of bid submission, WPD senior management identified and committed project team resources and the project manager appointed. External resources were committed from our partner organisations, (now captured in the form of an MOU). Therefore, the probability of resources not being available at the time of bid submission was substantially reduced.</p>
