Project code:	UKPN2002	Question Number	9
Question date	1 September 2011	Answer date	6 September 2011
Submission section question relates to	Section 6 – Project Readiness		
Topic	Project readiness		
Question	You state that the resources to undertake this project will be “allocated and mobilised”. Please can you say a little more about where the availability of resources, eg whether they will be recruited or allocated from the Low Carbon Teams, or from Business as Usual. Will the resources be dedicated to the project.		
Notes on question			
Answer	<p>Resources on the project will come from a number of different sources, and a number of the key project resources required have already been identified as shown in the project organogram in Appendix E of our submission, which also identifies whether these resources are UK Power Networks internal, UK Power Networks external or project partner resources.</p> <p>Project sponsorship will be provided by UK Power Networks’ Director of Strategy &amp; Regulation and CFO. Senior Responsible Owner and Project Director roles will be undertaken by senior managers from our Future Networks team on a dedicated basis initially, and then on a part-time basis for the remainder of the project. Our Project Manager is a senior member of the Future Networks team, and will be dedicated to the project. The Commercial Design Authority role also will be undertaken by a resource from the Future Networks team, who will work on the project on a dedicated basis initially, and then part-time basis for the</p>		

	<p>remainder of the project.</p> <p>We recognise the importance of system integration activities for this project and as a result we are in the process of creating a new internal role of Operational Telecomms Integration Engineer to be created in coordination with UK Power Networks' Network Operations and Operational Telecommunications departments. A job description for this role will be created by end the of November, and internal recruitment will start upon a positive LCNF T2 funding award. The Integration Engineer will be dedicated to the FPP project throughout key systems integration stages, undertaking the role of workstream lead for WS8, and will work with UKPN internal and external specialists as required.</p> <p>Technical workstreams WS1 and WS4 will be led by senior project delivery experts from the project partners responsible for those workstreams, who will be dedicated to the project as required.</p> <p>Workstream WS2 includes the delivery of several technical solutions by a number of project partners, and will be led by an external specialist project delivery resource who will be dedicated to the project as required.</p> <p>Workstream leads for workstreams WS3 &amp; 6 and WS5 &amp; 7 are yet to be allocated, and may come from either the Future Networks team or Business as Usual resource. These resources who will be dedicated to the project.</p> <p>Other project resources such as Procurement/Legal/Finance support, IT architect, site manager, SAP resource, H&amp;S support, real time systems engineer, asset engineer, protection applications engineer and infrastructure planning engineer will be allocated from Business as Usual.</p> <p>The following roles will be resourced externally and will be dedicated to the project: PMO resource &amp; Project planner, Technical design authority, Data modeller and Cyber security expert.</p>
