| Question | Can you confirm that the cost of anticipated incentive penalties for the CI & CLM at St Andrews is being met by your DNO Compulsory Contribution? | | |
| Notes on question | | | |
| Answer | Yes, we can confirm that the cost of anticipated incentive penalties for the CI and CML at St Andrews is being met by the DNO compulsory contribution. They have been accounted for in this manner as they would not normally be within the allowance for planned outages in DPCR5 as an outage of this nature would not be required for a 'traditional' reinforcement. | | |
