Project code:	SPT 2003	Question Number	23
Question date	03/11/2011	Answer date	09/11/2011
Submission section question relates to	Section 9		
Topic	SDRC		
Question	<p>As permitted under the governance document (p44) we would like to suggest some changes to your successful delivery reward criteria:</p> <p>Can you please remove the weighting you have placed on each SDRC. In the governance document (p65) we state that the Authority will determine the level of the successful delivery reward. Therefore, we can't agree to the weighting which you have set out.</p> <p>Separately, we note that in your submission, you state that your aim is to increase the headroom by 20% at each of your three sites (p5). This is reflected in SDRC for two of the three sites but not for the site at Wrexham. Could you please add a similar criterion for a 20% increase in headroom for Wrexham.</p> <p>Can you please revise your SDRC bearing these points in mind?</p>		
Notes on question			

Answer	<p>Section 9 has been updated to remove the weightings that were initially suggested.</p> <p>Additional wording has also been added to Criterion/Evidence 9.4 for the Wrexham site to clarify that the target will be to facilitate an additional 20% of PV compared to current standards as a result of undertaking this project.</p> <p>An updated version of the Final submission (v3) has been included which reflects these changes.</p>
