Project code:	SPT 2003	Question Number	1
Question date	25/08/2011	Answer date	30/08/2011
Submission section question relates to	Proforma Section 2		
Topic	St Andrews trial site		
Question	Please outline the likelihood of a developer connecting a 12MW windfarm to the 11kV network?		
Notes on question			
Answer	<p>The University of St Andrews is seeking planning permission from Fife Council to develop a six turbine (12 MW) wind farm on farmland it owns at Kenly Farm, by Boarhills.</p> <p>The move for planning approval follows a three-year process of detailed research on-site and discussion and consultation with representatives of local communities in Boarhills, Dunino and Kingsbarns.</p> <p>Long-term monitoring of wind speeds at Kenly shows that it is possible to generate enough electricity to meet the needs of the energy intensive scientific operations of the University as well as the rest of the institution's electricity demand.</p> <p>The project is still going through planning permission with the local council. A decision is expected before the end of 2011, and if it is successful, the wind farm would probably be constructed within the next five years. The university have engaged with local groups and the</p>		

	council and are optimistic that they will be successful.
