

As a small Business owner (I own two pubs), I would like to have to the energy companies banned from rolling over your contract - onto a much higher tarif. If it does roll-over, it should be at the same price, or the price plus inflation.

This is in effect bullying small businesses who may have missed the deadline due to an administrative oversight and forcing them to pay ridiculous rates for a whole year!

It is hard enough to run a business in these economic times without extra pressures like this!

Kind Regards
