

**Modifications to standard conditions of gas supply licence: Notice under Section 23(2) of the Gas Act 1986**

**Transfer of role of approving gas meter asset managers**

Dear Lesley

**Confirmation of Nil Return**

I have now completed my review of the consultation documentation that you sent to Russell Shepherd on 29 Mar 2010<sup>2</sup> and can confirm that that I have no GSMR/safety case related concerns. In addition, following internal HSE consultation with my downstream gas colleagues I can confirm we have no issues from that perspective either.

Therefore HSE do not object to or have further comment on this proposal.

Regards - Mike
