Project code:	SSET205	Question Number	SSES026
Question date	09-October-2012	Answer date	11-Oct-12
Submission section question relates to	5		
Topic	Knowledge Dissemination		
Question	<p>Can you confirm that the IPR arrangements meet the default IPR conditions set out in paragraph 2.9 of section five of version 5 of the LCN Fund Governance Document?</p> <p>Specifically, can you confirm that once the Project is over, Relevant Background IPR will be licensed for use by SSE in connection with the Relevant Foreground IP that will be owned by EA Technology set out in your response to SSES014 (the IPR embodied by information on the effectiveness of the Esprit device for mitigating distribution network problems resulting from the connection of Electric Vehicles)?</p> <p>We do not expect that the terms of this licence will be on arms-length terms or include provision for payment of a royalty. Can you confirm that this is the case?</p>		
Notes on question			
Answer	<p>We can confirm that the IPR arrangements for the I²EV project meet the default IPR conditions in Section 5, Paragraph 2.9 of the LCN Fund Governance Document v5.</p> <p>Specifically, we can confirm that once the project is over, Relevant Background IPR will be licensed for use by SSE, solely to the extent necessary, and for the use of Foreground IP that will be owned by EA Technology and generated as part of the project. There is no intention that the terms of this licence will be on arms-length terms or include provision for payment of a royalty. We expect that the precise terms will be agreed when establishing the contract between SEPD and EA Technology for the delivery of I²EV, prior to commencement of delivery of the project.</p>
