Project code:	WPD-T2-04	Question Number	WPD007
Question date	23.08.2012	Answer date	30.08.2012
Submission section question relates to	2 and 6		
Topic	Project Description and Project Readiness		
Question	Please explain the methodology that is to be adopted for the studies forming Method Alpha and identify the state of readiness of this work for implementation - are the methods already determined, or is basic research going to be required to develop a new analytical approach?		
Notes on question			
Answer	<p>The processes to be developed in Method Alpha are based on existing standards and Fault Level modelling and design principles. The Method aims to fully utilise these existing standards and Fault Level assessment processes by exploring and refining the underlining assumptions.</p> <p>Basic research is not required for developing the new analytical approach. From ISP to FSP the methodology has been scoped out and preliminary trials of elements of the methodology have been conducted.</p>
