Project code:	SPD2004	Question Number	SPD013
Question date	30/08/2012	Answer date	03/09/2012
Submission section question relates to	2		
Topic	Project Description		
Question	Please explain how the six proposed work packages map on to the eight Methods to be trialled in the project.		
Notes on question			
Answer	<p>Method 1 - Work Package 1. The stakeholder forum (1.1) will be used as a means to get feedback on the level of detail and usefulness of the data whilst 1.2 and 1.3 will be the creation of the data for the customers and using this in the viability study process.</p> <p>Method 2 – Work Package 2. The Enhanced connections process will require updating of the relevant design policies (2.1) and planning tools (2.3) and improvement in network visibility (2.2).</p> <p>Method 3 – Work Package 4.3, Community level connections.</p> <p>Method 4 – Work Package 4.1, Management of exporting distribution networks</p> <p>Method 5 – Work Package 4.2, Active Management of generation around network constraints</p> <p>Method 6 – Work Package 3. WP 3.1 will involve the detailed design and evaluation of network enablers with WP3.2, WP3.3 and WP3.4 being the workpackages which cover the roll out of the enabling technology.</p> <p>Method 7 – Work Package 5, Project Evaluation. This will involve the evaluation of all of the components of the project and develop the business processes and business case for the implementation of the various components of the project in the future.</p>		

	Method 8 – Work Package 6, through the knowledge transfer into the project we will be able to identify areas in other projects which may provide learning which will be beneficial to the project objectives.
