Project code:	SPD2004	Question Number	SPD018
Question date	30/08/2012	Answer date	03/09/2012
Submission section question relates to	5		
Topic	Knowledge Dissemination		
Question	Does SPD envisage any confidentiality issues around publishing information on the status of connections?		
Notes on question			
Answer	<p>Any information published on generation connections would be at an aggregated level which does not provide any sensitive information about individual enquiries/applications. For example our intention is at each primary/grid substation, as part of the provision of greater information, the total MW of generation applied and connected would be shown. Individual details of the generation would not be available however this would give a developer an indication of whether any other connections are being considered in the vicinity which may have a bearing on future connections.</p> <p>The exact nature of information which is provided will be consulted with stakeholders to ensure they are comfortable with what is provided and that it is useful to the connections process.</p>
