15th February 2013

Dear Phil,

Energy UK submission to the Ofgem Wholesale power market liquidity consultation on a 'Secure and Promote' licence condition

We have worked closely with members over the past months to create a response which we present to you in the form of a thought piece for the development of a framework to promote Wholesale Power Market Liquidity together with high level responses to your specific consultation questions. This is designed as a discussion document and we see this as representing the start of a process. It has been constructed with a group on which all the major independent generators, including renewables and fossil fuel participated as well as the vertically integrated companies. As such it is a pan industry document.

In developing the thought piece members have given due consideration to your proposals for a 'Secure and Promote' license condition.

I hope this will be useful and we would be happy to have a discussion with you and your team in the near future.

Should you require any further information please feel free to contact me on 020 7930 9390 or 07736 107 020

Regards

Barbara Vest
