Project code:	WPDT205	Question Number	6
Question date	29 August 2013	Answer date	2nd September
Submission section question relates to	2: Project Description Early Bilateral		
Topic	Commercial		
Question	Why wouldn't the operator of a renewable installation which is constrained at certain times of day, not install his own electrolyser and gas engine?		
Notes on question			
Answer	This is still unproven technology however once the trail has been completed and the learning disseminated we expect third parties will want to do install electrolysers with gas engines as an alternative to costly reinforcement.
