Project code:	NGGTGN01	Question Number	18
Question date	03 October 2013	Answer date	08 October 2013
Submission section question relates to			
Topic			
Question	Are there any other places where trialling of this application is being conducted? (Please explain how you have ascertained this.)		
Notes on question			
Answer	<p>To National Grids' knowledge there are no other places where VECTOR technology is being trialled.</p> <p>As part of the Innovation Funding Incentive project looking at the feasibility of utilising VIGV technology for National Grid compressors, Fraser Nash conducted an investigation into the application of VECTOR technology in the Natural Gas compression industries. This investigation consisted of a literature survey and conducting interviews with all six major Original Equipment Manufacturers for compressors who have expressed interest in working in the United Kingdom.</p>
