| Topic                                  | Evidence   |                 |                                 |
| Question                               | At the 2nd Bilateral meeting you indicated that you have reached an outline agreement for Rolls Royce to fund their own design costs, please indicate how this will impact on project costings and funding requirements.   |                 |                                 |
| Notes on question                      |  |                 |                                 |
| Answer                                 | <p>The arrangements discussed with Rolls Royce will ensure that costs associated with both the initial design and further detailed design will be met by the OEM. The project funding requirements will be reduced by £110K associated with OEM 1 design costs and £100k associated with prototype development. We would anticipate that if another OEM participates in the project, they would follow the same agreement as Rolls Royce, reducing project costs by £110k associated with OEM 2 design costs. The total reduction expected therefore is £320k.</p> |                 |                                 |
