03 February 2014

Dear Sir/Madam

Consultation on proposed updated form of the Data and Communications Company's Charging Statement for Service Charges ('Charging Statement')

Electricity North West have reviewed the proposed Charging Statement for Regulatory year ending 31st March 2015 and found in the main the document provides clarity on the charges applicable, is in a logical format and provides the relevant information on charges for Service Users.

However we have a few comments regarding Section 6, point 25, relating to the Table 4 example. The first bullet point explains the Service User Codes and refers them to the MRA codes for Charging Groups. We referred back to the DCC invoices we had received to understand what our Service User Code is and identified it as ED_NORW. The 'NORW' is our Market Participant Identification (MPID) and this is created in Market Domain Data which is owned by the Balance and Settlement Code (BSC) not the MRA.

Also in this paragraph it mentions the Service User Codes for all the charging codes but in the example only Charging Codes 1, 4 and 3 have been used it would therefore be more appropriate to reference only the codes used within the example.

Yours sincerely

Joanne Fallows

MRA and SEC Contract Manager
