Project code:	ENWT205	Question Number	6
Question date	29 August 2013	Answer date	5 September 2013
Submission section question relates to	Section 2: Project Description – Early Bilateral		
Topic	Technical		
Question	Are the capacitors mounted on the pavement as 'street furniture' or buried?		
Notes on question			
Answer	<p>The LV capacitors, whether situated at the distribution substation or on the LV cable network, will be housed in a cabinet. The cabinet will be surface mounted, so in the case of LV network connected capacitors, they will be located on pavements similar to other forms of street furniture.</p> <p>The cabinet chosen are similar in design and size to the cable TV street furniture prevalent in the north west from the roll-out of cable TV in the 1990s by NYNEX (now Virgin Media).</p> <p>These cabinets meet all relevant street furniture safety and security standards.</p>
