Date: 25 April 2014

Dear Colleague

**Project TransMIT: invitation to a stakeholder event**

We have today published a further consultation on proposals to change the electricity transmission charging methodology. The consultation sets out our analysis of additional evidence submitted by respondents to our August 2013 consultation in respect of CUSC Modification Proposal (CMP) 213. The consultation is available on our website.

We are holding an open event on Tuesday 6<sup>th</sup> May to discuss the consultation and to summarise the new information and further modelling work carried out by Baringa. It will be held from 14:00–16:30 at Regus-Victoria, Portland House, Bressenden Place, London, SW1E 5RS.

All interested stakeholders are invited. However, please note that this event will not be open to the media. We are keen to ensure that a broad range of stakeholder interests are represented but practical reasons mean that places are limited. In the case that we are oversubscribed, we may restrict places to one per organisation.

If you would like to attend, please email [project.transmit@ofgem.gov.uk](mailto:project.transmit@ofgem.gov.uk) by Friday 2 May 2014. If you have any further questions about the event please contact Donald Smith on 0141 331 6014.

Yours sincerely

Catherine Williams

Head of Commercial Regulation, Electricity Transmission
