IN CONFIDENCE

Dear James,

NGT Statement of Works Trials

We refer to your letter dated 21st January 2014 relating to the proposed trials that are to be instigated by NGET with regard to Statement of Works policy and the associated charges.

You may be aware that we wrote to NGET following the DG Fora and suggested that the policy required amending in light of the volume of small scale DG projects that were being received and processed by the DNO's. We are pleased to note that our concerns have now been recognised.

Therefore we are pleased to advise that :

- We are aware and understand the proposals that have been formulated by NGET.
- We fully support the proposals and believe that they will facilitate a quicker and cheaper methodology for the DG community whilst not detracting from fulfilling the requirements of either the DNO's or NGET.
- We do not have any concerns (at this time) and look forward to the results of the trials.

We trust that the above is acceptable but please do not hesitate to contact me should you consider that we can assist further.

Yours faithfully,

Bob Weaver
Director
