

Making a positive difference  
for energy consumers

Consumers, Electricity  
Generation and/or Supply licence  
holders, Traders, System  
Operator, and Other Interested  
Parties

Date: 8 July 2014

Dear Colleagues,

**Publication of the key modelling results data used to inform the Electricity  
Balancing Significant Code Review (EBSCR) decision.**

This letter informs stakeholders of Ofgem's publication of key modelling results data used to inform the EBSCR Final Policy Decision and Impact Assessment.

We publish this data to help stakeholders understand further the EBSCR analysis and decision as well as to support industry's assessment of the subsequent modifications.

The publication will not include the model itself or the full results from the model. This owes to the commercially sensitive nature of much of the data. However it will contain key results, grouped or aggregated. For more information on the model and the data provided please see the overview page of the document.

If you have any comments or questions on the content of this letter, please contact the EBSCR team at [EBSCR@ofgem.gov.uk](mailto:EBSCR@ofgem.gov.uk).

Yours sincerely

**Mark Copley**
