Dear Mr McCrone,

Statutory consultation on proposed licence modifications to facilitate the implementation of the Capacity Allocation Mechanisms Network Code in Great Britain

BG Group plc (BG) thanks Ofgem for the opportunity to respond to the consultation on the proposed licence modifications to facilitate the implementation of the Capacity Allocation Mechanisms Network Code in Great Britain. As previously stated, BG recognises Ofgem's requirement to implement the Capacity Allocation Mechanism (CAM) network code by 1st November 2015 and BG's views remain consistent with those expressed in our response dated 7th August 2014.

BG is supportive of the proposed licence changes as it recognises that the proposed approach is a sensible solution to comply with CAM. However BG still believes that given there is no fungibility that further amendments should be made so that any shipper with Bacton entry capacity beyond 1st November 2015 should have the right to terminate any such capacity.

Yours sincerely,

Andrea Webster
Origination Manager
