Capacity Market Rules Change

Reference number (to be
completed by Ofgem):
P010

Name of Organisation(s) / individual(s):
Drax Power Limited

Date Submitted:
23 January 2015

Type of Change:

- Amendment**
- Addition**
- Revoke**
- Substitution**

If applicable, whether you are aware of an
alternative proposal already submitted which
this proposal relates to:
N/A

What the proposal relates to and if applicable, what current provision of Rules the proposal relates to (please state provision number):

The end of round results should be made publically available to all market participants, not just participants taking part in the auction. A new paragraph can be inserted into Rule 5.10

Description of the issue that the change proposal seeks to address:

During the T-4 auction taking place in December 2014, participants in the auction were informed at the end of each round whether the auction had cleared and what level of excess capacity remained at the end of the round. This information should be publicised to the whole market, rather than just to participants. This improves market transparency ensuring all market participants have access to the same information at the same time.

If applicable, please state the proposed revised drafting (please highlight the change):

Insert a new paragraph into Rule 5.10 which says that the Delivery body must publish the high level round results to the market at the end of each round. The Delivery Body must notify the public in advance where these results will be published. The high level round results will include the following information: Round number; Price Floor (£/kw); Clearing Capacity at the Price Floor (MW); Status (the round has cleared / not cleared); and Excess Capacity (rounded to 1,000MW).

Analysis and evidence on the impact on industry and/or consumers including any risks to note when making the revision - including, any potential implications for industry codes:

This improves market transparency ensuring all market participants have access to the same information at the same time.
