for energy consumers

Capacity Market Rules Change

Reference number (to be
completed by Ofgem):
P014

Name of Organisation(s) / individual(s):
Energy UK

Date Submitted:
23 January 2015

Type of Change:

- Amendment
- Addition
- Revoke
- Substitution

If applicable, whether you are aware of an alternative proposal already submitted which this proposal relates to:
[Click here to enter text.](#)

What the proposal relates to and if applicable, what current provision of Rules the proposal relates to (please state provision number):

Amending the definition of RFR in Rule 8.5.3 to clarify what the “most recent capacity report” is.

Description of the issue that the change proposal seeks to address:

RfR definition says it is the amount in MW published in the latest electricity capacity report. It is not clear what this references. For example, RFR cannot be found in the 2014 capacity report. The definition of RfR should clarify what the latest electricity capacity report is (e.g. National Grid Electricity Capacity Report).

If applicable, please state the proposed revised drafting (please highlight the change):

Capitalise “Electricity Capacity Report” in Rule 8.5.3 definitions: RfR is the reserve for response amount (in MW) published in the most recent National Grid Electricity Capacity Report prior to the T-4 Auction for the relevant Delivery Year. Then add definition to Rule 1.2: “Electricity Capacity Report” means the report specified in Regulation 7.

Analysis and evidence on the impact on industry and/or consumers including any risks to note when making the revision - including, any potential implications for industry codes:
