

Making a positive difference
for energy consumers

Capacity Market Rules Change

Reference number (to be
completed by Ofgem):
P015

Name of Organisation(s) / individual(s):
Energy UK

Date Submitted:
23 January 2015

Type of Change:

- Amendment
- Addition
- Revoke
- Substitution

If applicable, whether you are aware of an alternative proposal already submitted which this proposal relates to:
[Click here to enter text.](#)

What the proposal relates to and if applicable, what current provision of Rules the proposal relates to (please state provision number):

The timing and format of publication of the provisional and final auction results need to be formalised. A new paragraph can be inserted into Rule 5.10

Description of the issue that the change proposal seeks to address:

Prior to the 2014 auction it was unclear when the provisional results would be published and what the contents of the provisional results would be. This created a lot of uncertainty so we believe that the process should be formalised in the Rules.

If applicable, please state the proposed revised drafting (please highlight the change):

Insert a new paragraph into Rule 5.10 which says that the Delivery body must publish the high level round results to the market at the end of each round. The Delivery Body must notify the public in advance where these results will be published. The high level round results will include the following information: (a) Round number, (b) Price Floor (£/kw), (c) Clearing Capacity at the Price Floor (MW), (d) Status: the round has cleared / not cleared and (e) Excess Capacity (rounded to 1,000MW).

Analysis and evidence on the impact on industry and/or consumers including any risks to note when making the revision - including, any potential implications for industry codes:
