

Making a positive difference
for energy consumers

Capacity Market Rules Change

Reference number (to be
completed by Ofgem):
P017

Name of Organisation(s) / individual(s):
Energy UK

Date Submitted:
23 January

Type of Change:

- Amendment**
- Addition**
- Revoke**
- Substitution**

If applicable, whether you are aware of an
alternative proposal already submitted which
this proposal relates to:

What the proposal relates to and if applicable, what current provision of Rules the proposal relates to (please state provision number):

Rule 3.6.1, 3.5.4, 3.5.5, 3.4.5(d), definition of De-rated Capacity.

Description of the issue that the change proposal seeks to address:

Specify the accuracy of metering information provided by amending Rule 3.6.1, 3.5.4, 3.5.5, 3.4.5(d), and definition of De-rated Capacity.

Currently there is no specification of accuracy of capacity information within the Prequalification Rules, relating to submissions made by applicants to the Delivery Body. The accuracy of the information provided, and result of calculations detailed in the rules, should be specified. This will reduce the risk of non-qualification as well as potential disputes arising, where different rounding has been used.

If applicable, please state the proposed revised drafting (please highlight the change):

Drafting of "Physically generated net output" throughout those Rules should be followed by "in MWs to 3 decimal places".

Analysis and evidence on the impact on industry and/or consumers including any risks to note when making the revision - including, any potential implications for industry codes:

Details of Proposer (please include name, telephone number, email and organisation):
