for energy consumers!

Capacity Market Rules Change

Reference number (to be
completed by Ofgem):
P019

Name of Organisation(s) / individual(s):
Energy UK

Date Submitted:
23 January 2015

Type of Change:

- Amendment
- Addition
- Revoke
- Substitution

If applicable, whether you are aware of an alternative proposal already submitted which this proposal relates to:

What the proposal relates to and if applicable, what current provision of Rules the proposal relates to (please state provision number):

Include a definition of a “day” into the Rules.

Description of the issue that the change proposal seeks to address:

There is no definition of a day. In a market which works on days as 24 hour periods starting 23:00, it makes sense to be specific. Days are used to separate periods over which metering has been measured, and is required to be proven, during the prequalification and demonstrating satisfactory performance stages of the capacity market. Historically the GB Electricity Market has used a number of different “days”; for example electricity is traded on 24 hour periods starting 23:00.

If applicable, please state the proposed revised drafting (please highlight the change):

The Rules should define a “day” as “the period from 00:00 hours to 24:00 hours on each day”.

Analysis and evidence on the impact on industry and/or consumers including any risks to note when making the revision - including, any potential implications for industry codes:

Details of Proposer (please include name, telephone number, email and organisation):
