Capacity Market Rules Change

Reference number (to be
completed by Ofgem):
P030

Name of Organisation(s) / individual(s):
Green Frog Power

Date Submitted:
23 January 2015

Type of Change:

- Amendment**
- Addition**
- Revoke**
- Substitution**

If applicable, whether you are aware of an alternative proposal already submitted which this proposal relates to:

What the proposal relates to and if applicable, what current provision of Rules the proposal relates to (please state provision number):

Amend Rule 3.4.3 (a) (i) to clarify that the description and location of the CMU should include a specific address, a site plan, and a satellite photo (e.g. Google Maps).

Description of the issue that the change proposal seeks to address:

This requirement will remove any uncertainty that may exist with regard to the risk that CMUs are receiving Capacity Agreements without a physical plant, or that they are manipulating the auction outcome by early auction departure (thereby affecting the clearing price) without real, (potentially) operating generating units. We believe that providing this information and documentation is not an onerous or unreasonable task in the context of the potential benefit.

If applicable, please state the proposed revised drafting (please highlight the change):

3.4.3. (a) (i) ...where the description and location of the generating units consists of the address, a site plan and a satellite photo of the site.

Analysis and evidence on the impact on industry and/or consumers including any risks to note when making the revision - including, any potential implications for industry codes:

N/A

Details of Proposer (please include name, telephone number, email and organisation):
