for energy consumers

Capacity Market Rules Change

Reference number (to be
completed by Ofgem):
P036

Name of Organisation(s) / individual(s):
National Grid Electricity Transmission Ltd

Date Submitted:
23/01/2015

Type of Change:

- Amendment**
- Addition**
- Revoke**
- Substitution**

If applicable, whether you are aware of an alternative proposal already submitted which this proposal relates to:

No

What the proposal relates to and if applicable, what current provision of Rules the proposal relates to (please state provision number):

Rule 8.3 sets out the specific obligations and consequences for capacity providers should they relocate a CM Unit.

Description of the issue that the change proposal seeks to address:

There is no link to Rule 7.5.1 (r) which sets out how the location of a CMU can be updated. A process to define exactly how this should be taken forward is required, for example how it interacts with metering tests/assessments and how it impacts the declarations and statements made at prequalification for the previous site

If applicable, please state the proposed revised drafting (please highlight the change):

A review of Rule 8.3 and 7.5.1 (r) is required.

Analysis and evidence on the impact on industry and/or consumers including any risks to note when making the revision - including, any potential implications for industry codes:

The rules are not fully aligned and it is possible for a CMU to move but potentially breach Rule 8.3 in the process.

Details of Proposer (please include name, telephone number, email and organisation):

James Greenhalgh,
Capacity Mechanism Manager,
National Grid Electricity Transmission,
