for energy consumers

Capacity Market Rules Change

Reference number (to be
completed by Ofgem):
P037

Name of Organisation(s) / individual(s):
National Grid Electricity Transmission Ltd

Date Submitted:
23/01/2015

Type of Change:

- Amendment
- Addition
- Revoke
- Substitution

If applicable, whether you are aware of an alternative proposal already submitted which this proposal relates to:

No

What the proposal relates to and if applicable, what current provision of Rules the proposal relates to (please state provision number):

Rule 14.4.5 sets out the timescales to provide information to the Settlement Body

Description of the issue that the change proposal seeks to address:

The timescales for the System Operator to provide all information to the Settlement Body within 5 working days of the end of the month rely on DNOs and Elexon (as BSCCo) providing data in a timely manner to support this.

The timescales may need to be extended as the determination of the parameters referred to in this clause may not be able to be provided in the currently stated timescales as they are reliant on third parties providing information to National Grid.

If applicable, please state the proposed revised drafting (please highlight the change):

Propose that the data is to be provided as soon as reasonably practicable.

Analysis and evidence on the impact on industry and/or consumers including any risks to note when making the revision - including, any potential implications for industry codes:

If a stress event occurred near the end of the month it is likely to be very difficult to provide the relevant information in the timescales set out in the Rules.

Details of Proposer (please include name, telephone number, email and organisation):

James Greenhalgh,
Capacity Mechanism Manager,
National Grid Electricity Transmission,
