for energy consumers

Capacity Market Rules Change

Reference number (to be
completed by Ofgem):
P061

Name of Organisation(s) / individual(s):
National Grid Electricity Transmission Ltd

Date Submitted:
23/01/2015

Type of Change:

- Amendment
- Addition
- Revoke
- Substitution

If applicable, whether you are aware of an alternative proposal already submitted which this proposal relates to:

No

What the proposal relates to and if applicable, what current provision of Rules the proposal relates to (please state provision number):

Rule 3.6.1 (b) requires all applicants for non-CMRS generating CMUs to provide a letter from the supplier confirming the output of the CMU in the 3 highest settlement periods identified in part (a) of this rule.

Description of the issue that the change proposal seeks to address:

The proposal is to modify this rule such that where the Non-CMRS Generating CMU is made up of multiple components, the output of each component, during the 3 settlement periods, is identified in the supplier letter.

If applicable, please state the proposed revised drafting (please highlight the change):

Modify Rule 3.6.1 (b) to add that the output of each component should be specified.

Analysis and evidence on the impact on industry and/or consumers including any risks to note when making the revision - including, any potential implications for industry codes:

This amendment is proposed because the Delivery Body has to verify the outputs of each generating unit in a CMU (Rule 4.4.2 (e)) and where a unit is a non-CMRS generator the only means of doing this is via the supplier letter. If the individual components are not identified then the CMU may not be able to be prequalified.

Details of Proposer (please include name, telephone number, email and organisation):
