## Capacity Market Rules Change

Reference number (to be  
completed by Ofgem):  
**P065**

<b>Name of Organisation(s) / individual(s):</b> National Grid Electricity Transmission Ltd	<b>Date Submitted:</b> 23/01/2015
<b>Type of Change:</b>  <input checked="" type="checkbox"/> Amendment  <input type="checkbox"/> Addition  <input type="checkbox"/> Revoke  <input type="checkbox"/> Substitution	<b>If applicable, whether you are aware of an alternative proposal already submitted which this proposal relates to:</b>  No
<b>What the proposal relates to and if applicable, what current provision of Rules the proposal relates to (please state provision number):</b>  This proposal seeks to clarify how a successful bidder in a transitional auction specifies which of the capacity products it wishes to apply to its CMUs	
<b>Description of the issue that the change proposal seeks to address:</b>  Currently the rules say:  11.3.3 Awarding a Capacity Agreement (a) Any Bidder that is provisionally notified that it has been awarded a Capacity Agreement pursuant to Rule 5.10.1 must immediately notify the Delivery Body which of the two products referred to in Rule 11.3.1 above it wishes to provide.  As the provisional results are posted on the auction system the use of the term “immediately” could be difficult to enforce and could cause difficulties post auction.	
<b>If applicable, please state the proposed revised drafting (please highlight the change):</b>  We believe that a bidder in a transitional auction should make a declaration at D-10 as to which of the products would be the default position for each of their CMUs. Bidders would then be allowed to change between the products as they wished from the start of the auction up until 30 minutes after the provisional results have been posted. If a successful bidder did not change their selected product during the auction, then they would get an agreement with the product they selected at D-10.	
<b>Analysis and evidence on the impact on industry and/or consumers including any risks to note when making the revision - including, any potential implications for industry codes:</b>  This would clarify how a successful bidder in the transitional auction informs the delivery body to which capacity product they require.	
<b>Details of Proposer (please include name, telephone number, email and organisation):</b>
